2007-01 Conclusion

Nick Hilliard

Head of Operations

nick@inex.ie

- Make PA more attractive than PI
- Prevention of abuse, hijacking, etc
- Tighten up on sub-assignment
- "Responsible Stewardship"
- Get good policy into place before any IPv6 PI is assigned

- Policy states "Deal with The Problem"
- Pre-implementation planning requires
  - budgetary planning
  - liaison with NL tax authorities
  - update to RIPE NCC Articles of Association
  - legal opinion on what's important for LIR end-user contracts
  - approval at RIPE General Meeting
- Implementation
  - carefully managed multi-year project
  - ERX will probably be put at the bottom of the list

- via existing LIR
  - it would be helpful for the RIPE NCC to provide a sample outline contract to help LIRs
- direct from the RIPE NCC
  - there are special cases (e.g. ccTLDs, smaller IXPs) where political neutrality is as much of a problem as paying multiple kilo-euros
  - probably will be implemented through associate membership category
  - Lower cost, fewer rights and responsibilities

That's all folks...

...any questions?
