Data Protection Task Force

Denis Walker

Meeting on Monday

- Several issues discussed:

- RIPE Database Terms and Conditions

- Removal of Personal Data Procedure

- Bulk Access to RIPE Database

Terms and Conditions

- These were approved subject to some corrections.

- Final document will be published shortly after RIPE 56 when corrections applied.

Main Issues

- All users have to adhere to these Terms and Conditions

- Hierarchy in use (see definitions): Registrant, maintainer and user

- Only maintainers may update the RIPE DB

- Maintainers responsible for the accuracy of the data

- Purpose of the RIPE DB is defined (limits the use)

- Link with Acceptable Use Policy (still has to be finalised)

- RIPE NCC can remove data (Removal of personal data procedure)

Implementation

- Publish document after RIPE 56

- One month period for comments

- Review of comments and make effective.

Removal of Personal Data

- This procedure was approved.

- Final document will be published shortly after RIPE 56.

Main Points

- Any request will always be referred to the maintainer first.

- RIPE NCC will only take action if maintainer does not respond or does not satisfy users request.

- Some personal data will not be removed.

Bulk Access

- NRTM procedure without personal data was approved.

- This is now in use, see http://www.ripe.net/db/support/about-nrtm.html

- No bulk access will be allowed to personal data for any purpose.

WHAT NEXT?

- Publish documents

- Finalise RIPE NCC Privacy Statement

- Re-write AUP for Proxy Access to the RIPE Database

Questions?
