Update

i n e x
i n t e r n e t n e u t r a l e x c h a n g e

- Admin stuff
 - 36 full, 13 associate members - up a bit since RIPE-55
 - Peak organic traffic growth of > 50% since RIPE-55
 - spikes above this mostly due to video streaming
 - (politics is still very popular topic)
 - Technical operations now > 1 FTE
- Networking stuff
 - Recently did 10G upgrade
 - notable only for how little trouble it was
 - we do unicast storm filtering on 10G ports
 - Implemented route servers in 2007/Q4 using Quagga
 - lesson learned: route servers more subtle than they look
- Conference Stuff
 - IETF (July 27th to Aug 1st) and EPF (Sep 15th and 16th)

So long and thanks for all the fish!

That's all folks...

...any questions?
